

You should get into groups of 3 or 4. Each student should have one marksheet.

- 1) **Half the class** will spend **10 minutes** discussing the topic.
- 2) The **other half** will use the marksheets to grade another group. **If you are grading, you should NOT interrupt or take part in the discussion.** Choose **ONE** person to observe, and tick the appropriate boxes/points while listening.
- 3) After 10 minutes, consider where the majority of your ticks appear (i.e. they are mostly within band 4) and give a corresponding **grade out of 40**. Provide **ONE written target for improvement** (look at the band above for tips).
- 4) We will then swap halves, **repeating step 2 and 3**.
- 5) After both groups have gone, you should give the marksheet back to the person you observed.
- 6) Consider the grade you have received. Give yourself **ONE target for improvement (different to the one given by your peer)**.
